

ISSUE LOG			
Project Name	WorkFlow		
Issue #	Description	Priority	Status
1	Teams have just been formed and we are required to share files (PDFs and code) and ideas throughout the coming weeks. We must choose a communication platform that will allow us to work together outside of class.	High	Not started
2	We chose to utilize Discord since all of us have accounts. It is easy to share files and communicate 24/7. Seonyou established the team project server and sent out invitations to the team members.		Completed
