PROJECT STATUS REPORT

Project Name	WorkFlow
For Week Ending	Week10 Date: Nov 7, 2023
Project Status	Green ☺
Status Description	Implementation of client-side coding

Activities—During the Past Week

We have done html and css.

Activities—Planned for Next Week

Our main goal for the upcoming week is to deliver the initial front-end code to stakeholders for a comprehensive review. The purpose of this review is to examine the general layout of the webpage and identify any potential issues that could cause crashes or negatively impact the user experience. We will be collaborating with stakeholders to gather feedback and insights, which will help us make necessary enhancements and adjustments to ensure positive user experience.

Project Issues

We still haven't decided on the database model for our project, which is causing some uncertainty in our project architecture and might affect upcoming development stages.
